DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 7 is rejected under 35 U.S.C. 102(e) as being anticipated by Applicant's Admitted Prior Art **AAPA** (*see the specification of the instant application, pages 1-4*).

3. Claim 7, **AAPA** teaches a method for reducing an amount of electrical power consumed by an electronic unit [*page 1, paragraph 0002*], comprising;

placing a CPU associated with electronic unit into a sleep state upon an occurrence of a predetermined event [*placing the CPU into sleep state when the vehicle is parked, see the specification of the instant application, paragraph 0002*];

periodically returning the CPU to a normal operation state, from the sleep state, for a predetermined period of time [*see the specification of the instant application, paragraphs 0003-0004*]; and

determining whether the electronic unit is to perform a predetermined task when the CPU is returned to the normal operation state for a predetermined period of time [*determining whether an actuation signal has been inputted to an input port of the CPU, see the specification of the instant application, paragraphs 0004-0005*].

Allowable Subject Matter

4. Claims 8-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. Claims 1-6 and 15 allowed.
